

March 23, 2020

Dear valued customer,

A few days ago, we updated you on the situation inside the SommoMed world, and would like to update you regularly, to keep you informed and up to date.

A week in today's world is like a year in normal times, and we constantly have to adjust our activities and measures, whereby our priority always is to secure the health of our employees as much as we possibly can.

Furthermore, we obviously also have to follow new regulations and rules in the various countries, also here, safety first, we rather do more than less for our people.

We all know, and heard, the best and most promising way against Covid-19 is to limit the contacts among people to the absolute minimum, and this is now, more or less, a global approach.

This also affects our production capacity, and we have to limit the number of people working in our productions, to secure their health and well-being, in other words, we will reduce our work force in our production by almost 90% to secure the recommended distance between all our production people, at least for the next 2 weeks.

We will not be able to give a delivery day anymore, we work with the limited resources we have, case by case, as quick as we can, but with an open delivery time, again this for the next 2 weeks, status today.

I hope you understand and value our measures and policies for the health of our employees and have the patience to overcome this period together with us.

Thank you very much

Martin Weiland
Exec. VP Sales & Marketing

Martin Mattes
VP Finance, Ops, Admin
